Analysis with WORLDVIEW 1 - Data Acquired 12 March 2012 & WORLDVIEW 2 - Data acquired 16 September 2011

This map illustrates satellite-based areas of refugee camps and semi-automated tents detections in Reyhanli district, Hatay province of Turkey. Between 16 September 2011 and 12 March 2012 an extension of the camp in its limits as well as in the number of detected tents has been observed. Around 350 new tents have been detected between 16 September

2011 and 12 March 2012. This tends to show that the number of settled Syrian citizens in Turkey increases and fluctuates. This is a preliminary analysis & has not yet been validated in the field. Please send ground feedback to UNITAR / UNOSAT.
